MOHAMMED HASAN MOZUMDER

FULL-STACK DEVELOPER

Chattogram, Bangladesh | +880 1793 506573 | searchio200@gmail.com
GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Full-stack developer and CSE student at CUET with hands-on experience building and deploying web applications using React, Next.js, TypeScript, Node.js, Express, and SQL/NoSQL databases. Experienced in authentication, database-backed workflows, REST APIs, and Gemini-powered AI features including semantic product discovery and study-abroad planning tools.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Frontend: React, Next.js, Vite, Tailwind CSS, HTML5, React Router

Backend: Node.js, Express.js, REST APIs, JWT authentication

Databases & ORM: PostgreSQL, MongoDB Atlas, Prisma, Mongoose

AI & Tools: Google Gemini API, MongoDB Vector Search, Git, GitHub, Vercel, Netlify, Docker

PROJECTS

Nexus — AI-Powered E-commerce Platform

Next.js, React, JavaScript, MongoDB Atlas, Mongoose, Gemini API

Live: nexushasandev.netlify.app | GitHub: AI-powered-Ecommerce-project

- Built and deployed a full-stack e-commerce application with product catalog and detail pages, search, filtering, sorting, cart, checkout, order history, authentication, and admin product management.
- Integrated Google Gemini with MongoDB Vector Search to retrieve relevant catalog products from natural-language queries, enabling semantic product discovery beyond exact keyword matches.
- Implemented database-backed product and order workflows using MongoDB Atlas and Mongoose, with NextAuth/JWT-based authentication and bcryptjs password hashing.

CUET Study Abroad Helper

React, TypeScript, Vite, Tailwind CSS, Node.js, Express.js, PostgreSQL, Gemini API

Live: cuetabroadstudy.vercel.app | GitHub: Study_Abroad_helper

- Developed a full-stack platform for exploring universities across listed countries, funded professor opportunities, and scholarships, with search, filtering, and authenticated saved items.
- Integrated Gemini-powered tools for country-specific expense overviews and an AI chatbot that responds to users' questions and prompts.
- Built an Express REST API backed by PostgreSQL, implementing JWT authentication and bcryptjs password hashing; deployed the application on Vercel.

CUET Library Management System

Node.js, Express.js, JavaScript, PostgreSQL, Prisma ORM, JWT, Docker

Live: cuet-library-management.vercel.app | GitHub: CUET-Library-Management

- Developed a database-driven library management backend for book catalog management, availability tracking, borrowing and returns, and borrowing-record management.
- Designed PostgreSQL data access with Prisma ORM, schema migrations, and seed scripts; implemented JWT authentication, bcryptjs password hashing, and role-oriented backend structure.
- Added backend support for file uploads with Multer and email functionality with Nodemailer; included Docker configuration for containerized development.

EDUCATION

Chittagong University of Engineering and Technology (CUET) — B.Sc. in Computer Science and Engineering

Relevant coursework: Data Structures, Algorithms, Database Management Systems (DBMS)
